

Trimmers Grass Cutting

At a glance...

Training (with Assessment) Competence with Modules

Duration Notes: The expected duration for the course is one day, however please note this may vary according to factors such as level of experience, modules or attachments selected, or the ratio of instructors to learners.

Delivery Method: Classroom and practical demonstration

Introduction

Not only will you become a certified operator, you'll also become a competent one. This trimmers course is suitable for everyone, whether you have a combi tool or a dedicated machine.

Overview in brief

The strengths of a grass trimmer are its mobility and flexibility.

It's a hand-held tool that allows you to get to difficult-to-reach areas where a standard mower simply cannot go.

But that convenience and versatility also increases the potential for accidents.

Our training course will teach you how to use a grass trimmer confidently, efficiently and safely.

The finer details

This is an integrated training and assessment course, ideal if you work in agriculture, landscaping, horticulture or grounds maintenance. Experienced instructors will guide you through how to use the tool expertly. You'll also learn pre-cutting tests, machine specific maintenance, and health and safety guidelines.

Once you've successfully completed our course, you'll receive a certificate of competence.

Course sessions:

- Prepare for trimmer operations
- Additional maintenance of a trimmer
- Battery operated machines
- Operating the trimmer
- Clearing the site and machine checks.

Who should attend?

This course is for people employed in agriculture, horticulture, landscaping, and grounds maintenance who is or will be required to operate a trimmer.

Note: Learners must be physically fit and be able to carry out the tasks in the course programme.

What will be covered?

At the end of this course, the Learner will be able to:

- Produce a site specific risk assessment for trimmer operations
- Identify the necessary personal protective equipment (PPE) required
- Identify the health and safety features required on a trimmer
- Identify defects on a trimmer and cutting equipment and decide which the operator can remedy, and which require a service engineer's attention
- Correctly carry out all routine maintenance in accordance with the machine manufacturer's operating manual (MOM)
- Prepare the trimmer for use with the correct fuel/oil mix
- Start the trimmer from both hot and cold start in a safe manner
- Carry out pre-cutting checks
- State the possible hazards/risks when carrying out maintenance or operational tasks
- Maintain the trimmer and cutting heads in a safe and efficient working condition
- Adjust the trimmer for safe and comfortable operation

- Select the correct cutting head for the relevant operating conditions
- Operate the trimmer in a safe manner having regard for the safety of the public, the property and environmental factors
- Organise the site and use a systematic method of working where possible.
