

# Tractor Driving Refresher

## At a glance...

### Training (with Assessment) Competence with Modules

**Duration Notes:** The expected duration for the course is one day, however please note this may vary according to factors such as level of experience, modules or attachments selected, or the ratio of instructors to learners.

**Delivery Method:** Training (with Assessment) Competence with Modules

## Introduction

Refresh your skills with our comprehensive tractor driving course.

## Overview in brief

The tractor is an essential piece of machinery for so many businesses and operating it safely and efficiently is absolutely vital.

If you are an experienced tractor driver this could be your preferred course.

## The finer details

This is a one-day integrated training and assessment course.

You will look at the key skills from our more intensive tractor driving course.

You'll receive a certificate of training once it is complete.

## Who should attend?

You will need some experience in tractor driving or have taken our full Tractor Driving course. We recommend training is refreshed every five years.

## What will be covered?

On completion of the course you will be able to:

- Perform a risk assessment
- Mount and dismount safely
- Understand the purpose and meaning of the instrumentation
- Understand the function of all controls
- Understand the hazards associated with using controls
- Understand the reasons for daily checks
- Start and stop the engine in a safe manner
- Be competent in driving a tractor in a forward and reverse direction
- Leave the tractor in a safe state
- Understand reasons for daily checks
- Competently perform checking of the lubrication, cooling and air intake of the engine, perform basic lubrication of the tractor and ensure the tractor is in a safe road going state
- Attach a mounted implement and manoeuvre in a forward and reverse direction with a mounted implement
- Attach a trailed implement and manoeuvre in a forward and reverse direction with a trailed implement
- Leave unattached implements in a safe state
- Correctly attach a PTO shaft between tractor and implement
- Attach the PTO shaft guards correctly
- Assess the minimum turning circle of the machine and the angle of the PTO shaft
- Carry out basic operations using tractor mounted loader.
