

# The Introduction to Installing and Maintaining Green Roofs

## At a glance...

### Training (with Assessment)

Duration Notes:	1 day
Delivery Method:	Training (with Assessment )
Recognised by:	LISS/CSCS
Prerequisites:	To do our assessed training course and to apply for your <a href="#">Red Trainee LISS/CSCS card*</a> , within 2 years of enrolment, you'll have to have completed: <ul style="list-style-type: none"><li>• CITB Working at Heights touchscreen test</li><li>• ROLO Health, Safety and Environmental Awareness course</li></ul>

## Introduction

Our dedicated course is the first of its kind, providing a new industry standard for knowledge and training in installing and maintaining green roofs.

## Overview in brief

Recent years have seen a rise in the use of green roofs.

It's likely that climate change and sustainable urban drainage issues will mean we'll see more and more green roofs being retro-fitted onto existing properties in the near future.

That's where our training comes in.

It's crucial that those installing and maintaining these green roofs are fully trained.

## The finer details

When you've done Stage 1, you'll be able to apply for your [Red Trainee LISS/CSCS card\\*](#)

If you're wondering, 'How do I apply for my Red Trainee LISS/CSCS card?' Please click [here](#).

This course is an assessed training course.

In this course, you'll cover the following sessions:

- Health and Safety/Legislation
- Background/History of Green Roofs
- Types of Green Roofs and Applications
- Site/Structural Considerations
- Drainage
