Introduction

This is a bespoke course developed by BNG Training and approved by Lantra Awards.

Overview in brief

Brushcutters/Strimmer, Pedestrian mowers and Ride on Mowers are very widely used in horticulture, landscaping grounds maintenance industries.

These machines are quite often used in public areas and also near waterways and without proper training, serious accidents can occur to the operator and potentially members of the public- a fact at the heart of our course and its objectives.

Who should attend?

Our course is suited for people who are employed in horticulture, landscaping grounds maintenance industries.

Every employer is responsible to ensure those who use work equipment receive adequate training for health and safety purposes.

What will be covered?

- State and comply with safety and legal requirements of a Brushcutter/Strimmer and Pedestrian and Ride on Mowers with an emphasis on safe practices, warning signs and guards
