

# Fencing and Gate Installation - Post and Strained Wire

## At a glance...

### Training (with Assessment) Competence

Duration Notes:	The expected duration for the course is one day, however please note this may vary according to factors such as level of experience, modules or attachments selected, or the ratio of Instructors to Learners.
Delivery Method:	Classroom and practical demonstration and assessment
Prerequisites:	Learners must successfully achieve the Fencing and Gate Installation Foundation Course before undertaking this module.

## Introduction

Becoming proficient in installing post and strained wire fencing is an essential and valued installer's skill for any contract, large or small.

## Overview in brief

This course will equip you with the knowledge and confidence to install post and strained wire fencing safely, protecting both you and those around you.

## The finer details

This training course has been developed to help you understand how to install post and strained wire fencing safely.

The amount of instruction you will require will depend largely upon your previous experience and sessions will be adapted to meet your needs. Course duration will depend on experience and will be from one to four days.

The training course will consist of theory and practical sessions, followed by assessment. Course sessions include:

- Types of Fence
- How to Install Strained Wire Fencing
- Theory Assessment
- Practical Assessment.

If successful in meeting the required standards assessed, you will be awarded a certificate of competence and a Lantra skills ID card.

In order to ensure you are given the appropriate information and guidance to work efficiently and safely, you must complete the Fencing and Gate Installation Foundation course (FHW06) before moving on to this system specific course.

### Who should attend?

This course is for you if you need to become proficient in safely installing post and strained wire fencing and gates.

As you'll appreciate, this course contains some practical activity that will require a minimum level of fitness. If you have any concerns, please speak to the provider.

### What will be covered?

At the end of this course, you will be able to:

- Describe the purpose and components of post and strained wire fence systems
- Describe the materials and installation requirements for post and strained wire fence systems
- Select and prepare tools, equipment and resources for post and strained wire fence systems
- Demonstrate how to calculate the required materials for post and strained wire fence systems
- Demonstrate how to position and fix posts at specified lines, levels and angles
- Prepare and install post and strained wire components to meet specifications
- Position and securely fix post and strained wire components at specified lines, levels and heights
- Demonstrate how to inspect, repair and post and test strained wire fence systems.
