| Prerequisites: | This qualification is available for learners aged 18+ wishing to develop knowledge, understanding and skills in working at height. |

Introduction

Lantra Awards Level 3 Award in Working Safely at Height.

Overview in brief

Given the nature of the potentially hazardous work undertaken by operatives working at height, a methodology of assessment which ensures the learner is occupationally competent has been designed.

This has been determined in collaboration with those who work in the industry and relevant professional bodies as well as ensuring that decisions which are made on competence are both valid and reliable.

The finer details

The Lantra Awards Level 3 Award has been developed to provide nationally recognised certification for those who work at height.

The Qualification aims to:

- Ensure learners' understand legislation and standards relates to working at height
- Assess learners' ability to effectively complete risk assessments

- Assess learners' ability to use equipment and systems to work safely at height
- Assess learners' ability to conduct aerial rescue.

Who should attend?

This qualification has been designed for individuals to develop their knowledge, understanding and skills for working at height and will enable them to work safely, effectively and efficiently in the workplace.
