

Conservation Detection Dog Handler (Skills Card)

At a glance...

Assessed Customised Provision

Duration Notes: 2 Weeks with pre-course learning package.

Delivery Method: Classroom and practical

Introduction

This course is designed to accredit a novice or experienced handler in the field of conservation detection dog handling.

Overview in brief

The course will cover all aspects of handling, maintenance and training, enabling the student to become an accredited dog handler.

The finer details

Students will receive quality instruction and training from one of the leading providers of conservation dogs in the UK. The student can expect to receive the some of the very best training available and additional support once completed.

Students will learn with a fully trained detection dog, receive a certificate of completion and be in a position to become a conservation detection dog handler in what is fast becoming a growth industry.

Who should attend?

Anyone who has a love of the environment and wishes to become a dog handler or who just wants to experience life as a detection dog handler.

What will be covered?

The main aspects of this course are:

- Basic animal care and maintenance

- Health and safety
- Preparing a detection dog for tasks/operations
- Conducting detection dog tasks
- Conducting canine first aid
- Conducting continuation training
- Supporting other agencies involved in conservation.
