

Conservation Dog Handler – Stoat (Skills Card)

At a glance...

Assessed Customised Provision

Recognised by: Lantra Awards

Prerequisites:

Introduction

The course is designed to accredit a novice or experienced handler in the field of conservation detection dog handling (Stoat).

Overview in brief

This Lantra-accredited Customised Award is exclusively developed and delivered by a Lantra-approved Training Provider, who meets our quality standards. The course is specifically tailored to meet learners' needs. For further details about the course content and delivery locations, please contact the Training Provider using the details provided below.

The minimum age to undertake this course is 16.

The course will cover all aspects of handling, maintenance and training, enabling the student to maintain, operate and advise on the capabilities of their Stoat Detection Dog.

Novice handlers will complete the full course, experienced handlers that can demonstrate prior knowledge and dog handling skills, need only attend the module.

The finer details

The course will focus on the latest detection dog training methodologies using science-based techniques including learning theory.

Maintaining the dog at the required level incorporating nutrition, fitness, health and first aid.
