

# Lift Trucks for Supervisors and Managers

## At a glance...

### Training (Only)

Duration Notes: The expected duration for the course is one day, however, please note this may vary according to factors such as level of experience, or the ratio of Instructors to Learners.

Delivery Method: Training (Only)

## Introduction

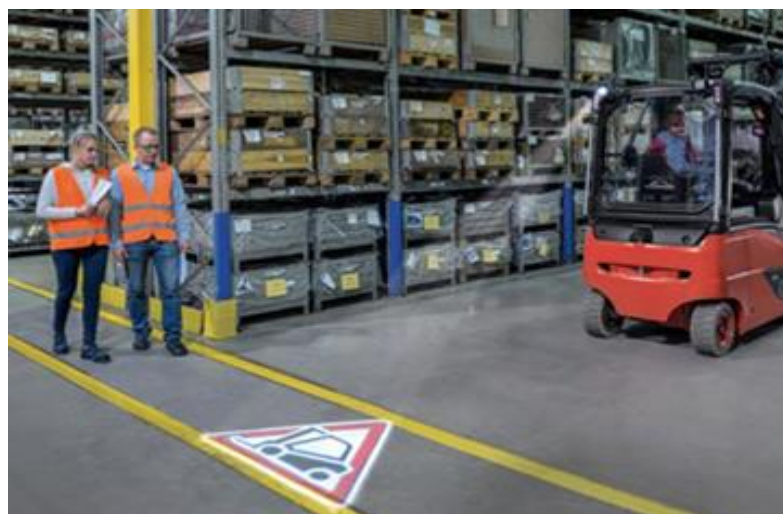

In your role as a supervisor or manager, gain a greater understanding of health and safety requirements and the ability to recognise and deal with potential hazards in a lift truck operating environment, with our one day training course.

## Overview in brief

A high percentage of accidents involving lift trucks are where operatives are where they shouldn't be and are struck, and seriously injured. Other accidents occur because of bad practice and an unsafe working environment.

The law requires supervisors and managers to provide adequate supervision to operatives/teams, so it is essential that supervisors and managers have enough training and knowledge to recognise safe and unsafe practices, to understand the risks involved, and how to avoid or prevent them.

Our course aims to give the supervisors and managers of lift truck operatives, the knowledge to direct their teams safely, ensure that the lift truck operations area is set up correctly, and give supervisors and managers basic knowledge of lift truck features, and how these impact safe lift truck operation.

## The finer details

An experienced instructor will guide you through the one day training course.

The course will give you increased confidence in recognising good and bad practice, and how to implement health and safety measures to reduce the risk of accidents involving lift trucks.

## Who should attend?

Our course is suitable for all Supervisors and Managers working in a lift truck operating environment. It is an ideal training opportunity for those new to a supervisor or manager role, and also refresher training for more experienced supervisors and managers.

## What will be covered?

By the end of this course, you'll be able to:

- Use theoretical and practical knowledge to recognise, prevent and correct unsafe practice resulting from the use of lift trucks
- Use the information and knowledge to assist in ensuring your own safety and the safety of others who may be affected by the use of lift trucks
- Understand your legal responsibility as a supervisor or manager
- Be aware of the main areas of the risk involved with lift trucks
- Spot good and bad practice
- Safeguard your business and reduce the risk of damage to your assets.

## Other areas of interest

- General lift truck operations
