Introduction

This is a bespoke course designed by industry experts and the Fire Service College. The aim of the course is to enhance the safety of first line responders within the traffic management sector.

Overview in brief

The course adopts a blended learning approach comprising the following;

- Tutor led theory
- Group discussions
- Group exercises utilising the XVR 'On Scene' simulation platform.
- Practical simulated incidents on the Fire Service College unique incident ground.
- Knowledge test

The finer details

The course includes the following sessions/topics;

- Situational Awareness
- Risk Awareness
- Risk Perception
- Risk Appetite
- Dynamic Risk Assessment
- Hazard Identification

These topics are discussed during the tutor led theory sessions and then put into practice during simulated incidents and practical demonstrations.

Who should attend?

First Line Responders for traffic management companies.

What will be covered?

- To increase Learners situational awareness in their operational environment.
- To give Learners a greater understanding of;
