

# Stationary Rope Work Positioning & Rescue

## At a glance...

### Training (with Assessment) Competence

Duration Notes:	3 days
Delivery Method:	Training (with Assessment )
Prerequisites:	This training course will be suitable for those currently in employment looking to enhance/update their skills and is also designed for those looking to progress into work and develop their career.

## Introduction

The Lantra Awards Stationary Rope Work Positioning and Rescue course has been developed to provide nationally recognised certification for those who use this technique to access a tree.

## Overview in brief

This course is intended to offer learners who will be accessing a tree using Stationary Rope Work Positioning the opportunity to achieve a recognised certificate of competence that reflects the National Standards for the type of role they perform.

## The finer details

Following feedback from industry and consultation with the HSE this integrated training and assessment course has been designed to replace the separate Lantra Awards Level 3 Award in Stationary Rope Work Positioning and Rescue and associated non assessed training. This ensures that personnel working within the industry meet the minimum required standards.

The training will provide the learner with the knowledge, understanding and skills required for using Stationary Rope Work Positioning.

## Who should attend?

This training course has been designed for individuals to develop their knowledge, understanding and skills for accessing a tree using Stationary Rope Work Positioning and will enable them to work safely, effectively and efficiently in the workplace.

## What will be covered?

The course aims to:

- Ensure learners have an understanding of legislation and standards related to Stationary Rope Work Positioning
- Assess the Learners ability to effectively complete risk assessments
- Assess the Learners ability to use equipment and systems to work using Stationary Rope Work Positioning
- Assess the Learners ability to complete Aerial Rescue using Stationary Rope Work Positioning.
