

Knapsack & Handheld Sprayer Maintenance

At a glance...

Customised Provision

Delivery Method: Theory and Practical

Prerequisites: Safe use of Pesticides & Handheld Applicator.

Introduction

This is generic course which along with the operator's manual will provide users the knowledge to complete maintenance & servicing.

Overview in brief

As a user of pesticides it is very important to ensure that your equipment is safe, fully calibrated, & in good working order. This is why Outlook Training, Greenscope Training & Harper Adams University collaborated to design this course with a view to prolonging the life of your equipment, ensure correct application and to save you time & money.

The finer details

This course is available for learners aged 16+ who hold a Safe Use of Pesticides & a Handheld Application of Pesticides qualifications.

You'll develop the knowledge to maintain & service handheld pesticide applicators.

Prolong the life of your equipment.

Help protect the environment by using trusted equipment.

Who should attend?

Users & anyone who is responsible for ensuring that the handheld spraying equipment that they use is fit for purpose.

What will be covered?

By the end of the course attendees will have gained the knowledge & understanding to: -

- Strip down the sprayer.
- Identify parts that are damaged / broken that need replacing.
- Safe working practices & personal safety.
- Reduce the risk of incorrect / off target application.
- Enables companies to ensure compliance with The Provision & Use of Work Equipment Regulations 1998.
- There is also the added benefit that the equipment will last longer & will be more cost effective than replacing the whole sprayer.
