

NEWS UPDATE – March 2025 Online Logbook Verification Sampling Strategy

Dear Training Provider,

Following our recent news update on the changes to the **Lantra Quality Strategy**, effective from **1st April 2025**, we would like to highlight the updated logbook verification process. This includes clarification on what is covered by the Lantra Quality budget and what may be chargeable to Training Providers.

As part of these changes, the number of logbook verifications will increase. **All active Assessors** will have at least one or more of their logbooks included in Lantra's sampling exercise. Our **External Quality Assurers (EQAs)** will review assessment decisions to ensure that all units are evidence-based and compliant with VACSRF standards (*Valid, Authentic, Current, Sufficient, Reliable, and Fair*).

Each assessment portfolio must clearly demonstrate how the Learner has met the required standard. It is the Assessor's responsibility to ensure this **story is clear, comprehensive, and verifiable**.

Logbooks verified through the sampling strategy will be recorded against the Assessor's profile for **Risk Rating** traceability. For a detailed outline of the process, please see the information overleaf.

Regards
NHSS & Highways Department
Lantra
