

We can announce that the new Lantra NHSS 12 ONE Smartcard (12ABCD) is now live

- All NHSS 12 skills will now be consolidated on to the single, ONE Smartcard.
- This will make it easier for you now with only just one card to manage.
- The single card approach to skills registration is now recognised as 'best practice' across several industries and, it's important the Highways sector keeps pace.
- As you add skills you can now check them on your ONE Smartcard. You will be responsible for scanning your own card using the GOSMART app or OMNI Key card scanner. Details of how to scan the card are featured on the reverse of the ONE Smartcard.
- See the example below of the information stored on the Smartcard.

- In order to keep ONE Smartcards up to date, you **MUST** scan your card after each training activity. This will add the relevant skill to your ONE Smartcard.
- You should allow 20 working days (from our receipt of order from the Provider) for the Lantra card update process.
- The life expectancy of the NHSS 12 ONE Smartcard is now 10 years as opposed to 5 years.
- Your skills will have their own unique expiry date which you must check.
- NHSS Smartcards featuring both skill and scheme will continue to be accessible after the launch of the NHSS 12 ONE Smartcard. You will still be able to check existing Smartcards but they will not be updated.

The New ONE Smartcard

Below is an example of how the new NHSS 12 ONE Smartcard will look.

Keep your skills current and your card with you at all times

To check your skills please scan the chip using GO SMART
